Subject: RE: Trails lflt - some Qs

Richard/Niall

After weeks of inactivity from FC map/design section, I now find I need instant answers to get the CV lflt going. Not good when I'm off on hol after Fri.

So can you assist with the attached Qs she asks. Richard, pl email your tracklog files direct to Anne Thompson (same address format as me) - she needs to read them into GIS. You have been rather ambitious with your plotting - the map has to be accurate for the way it will be at the start of use & several of your trail lines are 'wish list' rather than built trail. It's easy getting map/text tweaked at any reprint. Assume annual reprint as CV develops. I dearly wish we could just have a downloadable map but FC are apparently still addressing this with OS, so not feasible just now.

I want to discuss your (CVDG) thoughts on the various Qs. So once you've had a chance to digest this, can I discuss with either of you to agree answers, & I'll fire off a response to Anne by end of week. Too late for a meeting at this stage. I'm in office Thurs & Fri.

Thanks

Subject: Tracklog Imagery of mtb trails
Importance: High

Hi Rena,

Please find attached 3 .jpg images of the tracklogs showing the trails - you will be able to open these and view the screenshots. If it would help, I can also send through the tracklog files of these routes - unfortunately I can't merge them all into 1 route but they may be of use for the mapping work?

I've also checked the money regarding the signage - the £2000 was correct, however, I failed to take into consideration the cost of installation. We have £500 earmarked for the plastic markers and we are waiting on a price for installation - hopefully we will have this tonight as Dave Lewis is meeting someone to discuss the installation of the posts. We do have this funding set aside but we won't have £1500 left for the printing as we will need to also cover the cost of installation of the posts - I will get back to you with a figure for this once we know it.

If you have any queries regarding the Tracklogs data, please give me a call, also let me know if the map department would like the Tracklog files.

Regards,

Richard Barton.
