Subject: Re: Clarification of PID process

Jeremy,

Sorry, this may be perfectly clear to everyone else, but I am now confused at what this means.

Are the Forestry Commission now no longer committed to this project? What are the implications for the bids that have just been submitted by CSFT/CVDG, if this support is not forth-coming from FCS, as the landowner and one of the main partners? What message do we give out on the 12th May, when we are meant to be highlighting the next phases of development?

Robert

Dear Partners,

Following our last Carron Valley partnership meeting in April I reported that the Project Initiation document had been deferred. I attach a letter to clarify the position of the Forestry Commission regarding raising or committing funds to the project.

Jeremy
